

Patient Exercise Sheet: Back Exercises: Acute Back Pain

Physiotherapy

1 Lying Extension

2 Knee Hugs

3 Cat Exercise

4 Standing Extension

5 Standing Side Flexion

It is OK to feel some discomfort whilst completing the following exercises, which is entirely normal to begin with, providing the pain is not significantly worse the following day. We recommend to only exercise up to around 4-5/10 if zero is no pain and 10/10 is severe pain.

1 Lying Extension

Lying on your front on either the bed or floor, first rest your forehead on your hands, then if you can, move to resting through your elbows. Finally, if you want more of a stretch try to straighten your arms.

Hold for 10 seconds, slowly lower your chest back down. Repeat 10 X. You can also try holding this stretch for longer (30 sec to 2min) just do fewer repetitions.

2 Knee Hugs

3 Cat Exercise

4 Standing Extension

5 Standing Side Flexion

2 Knee Hugs

Lying on your back on either the bed or floor hug your knees into your chest.

Hold this for around 10 seconds, you can also try gently rocking side to side in this position.

3 Cat Exercise

Kneeling on all fours, keep your hips and shoulders still, arch your back up as far as you can, then arch your back down as far as you can.

Hold each position for 10 seconds. Repeat 10 X.

4 **Standing Extension**

5 **Standing Side Flexion**

4 Standing Extension

In standing with your hands on your lower back to help support it, stretch back as far as you can.

Hold for a couple of seconds. Repeat 3-5 X.

5 Standing Side Flexion

In standing slide your hands down the side of your legs reaching as far as you can towards the floor.

Hold for a couple of seconds. Repeat 3-5 X.
